

# Pre-Inspection Checklist

---

To carry out a suitable and sufficient fire risk assessment, please gather the following documents ahead of the site visit, or have them available on the day. If any items aren't held, let us know and we can advise on a simple logbook to put in place going forward.

## ■ Fire Safety Policy

Any document setting out the company's fire safety policy, procedures, and responsibilities.

## ■ Evacuation Plans

Building evacuation plans, including escape routes, assembly points, and any area-specific procedures.

## ■ Fire Drill Records

Records of fire drills carried out to date.

## ■ Fire Alarm Inspection Certificate

Most recent servicing/inspection certificate for the fire alarm system.

## ■ Fire Extinguisher Inspection Record

Most recent annual service record, plus any weekly/monthly checks if logged.

## ■ Emergency Lighting Inspection

Most recent annual inspection, including record of the 3-hour (180 minute) duration test.

## ■ Previous Fire Risk Assessments

Any prior FRA reports and fire door inspection surveys, if these have been carried out.

## ■ Dry Riser / Sprinkler Documentation

Last inspection certificate for dry riser or sprinkler systems, where applicable.

## ■ Electrical & Gas Safety

Current EICR and Gas Safe certificates, plus job sheets for any remedial works carried out.

## ■ Training Records

Records of fire marshal training and wider staff fire safety training, including how and when this was delivered.

## ■ Hazardous Materials Storage

Any DSEAR/COSHH risk assessments relating to storage of hazardous materials.

## ■ Building Layout Plans

Plans of the building, ideally including fire strategy drawings if available.

## ■ Fire Safety Inspection Reports

Any previous inspection reports, to help identify past recommendations and actions taken.

## ■ Maintenance Records

Maintenance records for relevant equipment, including work carried out by third-party contractors.

## ■ Kitchen Extract / Ansul Suppression

Maintenance certificates for kitchen extract or fire suppression systems, where applicable.

## ■ Internal Audit Checks

Any internal audit records for fire alarms, extinguishers, and emergency lighting.

---

*This checklist is a general guide — specific requirements may vary depending on the building and applicable regulations. If you're missing any of the above, we're happy to advise on free templates and simple recordkeeping to get you compliant ahead of the assessment.*
