DALMATIAN FIRE SAFETY

Fire Risk Assessment

Client Interview Sheet

Quick prompts for the on-site walk-round conversation with the client/RP. Jot short answers on the lines. Expand in the full report afterwards.

Premises / building name and address:

Date of visit: _____ Assessor: _____

Type of assessment (Type 1 / Type 3 / Commercial): _____

1. Responsible Person (RP)

Who is the Responsible Person for this building under the Fire Safety Order?

2. Competent Person

Is a competent person appointed for day-to-day fire safety checks (e.g. alarm testing, fire extinguisher checks)? Who?

3. History of Building / Construction

Approximate age of the building and any known construction type (e.g. traditional brick, timber frame, converted house, purpose-built):

Any history of conversion, extension, or change of use? When, and what changed?

Any known fire-related incidents, near-misses, or enforcement notices at this building?

Any major refurbishment, recladding, or compartmentation works carried out? Any certificates/documentation available?

4. Occupancy: Staff and Visitors

How many people normally occupy the building (residents/staff/tenants), and roughly how many visitors at peak times?

Are there any known vulnerable occupants (mobility issues, sensory impairment, cognitive impairment, very young/elderly)?

Are there sleeping risks on-site (residential/overnight stays)? If so, where and how many?

5. How the Building Is Used

What is the building actually used for day-to-day (confirm matches assumed use: residential, office, mixed, storage, etc.)?

Are there any special activities or processes with added fire risk (e.g. commercial kitchen, workshop, storage of flammables, e-bike/e-scooter charging, out-of-hours hire)?

Any part of the building not in normal use, vacant, or under works at the moment?

Any recent or planned changes to how the building is used?

6. Evacuation Plans

What is the building's evacuation strategy (Stay Put / Simultaneous evacuation / other)? Confirm this matches what's actually displayed/installed.

Is there a written fire evacuation/emergency plan? When was it last reviewed?

Has a fire drill or evacuation exercise been carried out? When, and were there any issues?

Who is responsible for calling the fire brigade / coordinating evacuation on the day?

Assembly point: is one specified, and is it known to occupants?

How many exits are there from the building, and which are normally used? Where are the final exits?

How many staircases are in the building?

7. PEEPs (Personal Emergency Evacuation Plans)

Are there any occupants who would need a PEEP (residents, staff, or regular visitors with a disability or condition affecting escape)?

Are PEEPs currently in place for anyone? Who holds them, and are they up to date?

8. Training (staff) / Engagement (residents, visitors, students)

What fire safety training have staff had (a training matrix, fire awareness, warden or marshal certificates), and how are residents or visitors told what to do in a fire?
