

Fire Risk Assessment

Pre-Inspection Checklist - General v26-09

To carry out a suitable and sufficient fire risk assessment, please could you gather the following documents ahead of the site visit, or have them available on the day. Not every item will apply to every building, and if something isn't held, just let us know — we can advise, and can also help you put a simple logbook in place going forward.

- ☐ **Previous Fire Risk Assessments**
Any prior FRA reports and fire door inspection surveys, if these have been carried out.
- ☐ **Electrical & Gas Safety**
Current EICR and Gas Safe certificates, plus job sheets for any remedial works carried out.
- ☐ **Hazardous Materials Storage**
Any DSEAR/COSHH risk assessments relating to storage of hazardous materials.
- ☐ **Fire Alarm Inspection Certificate**
Most recent servicing/inspection certificate for the fire alarm system.
- ☐ **Fire Extinguisher Inspection Record**
Most recent annual service record, plus any weekly/monthly checks if logged.
- ☐ **Emergency Lighting Inspection**
Most recent annual inspection, including record of the 3-hour (180-minute) duration test.
- ☐ **Building Layout Plans**
Plans of the building, ideally including fire strategy drawings if available.
- ☐ **Fire Safety Policy**
Any document setting out the company's fire safety policy, procedures, and responsibilities.
- ☐ **Evacuation Plans**
Building evacuation plans, including escape routes, assembly points, and any area-specific procedures.
- ☐ **Fire Drill Records**
Records of fire drills carried out to date.
- ☐ **Training Records**
Records of fire marshal training and wider staff fire safety training, including how and when this was delivered.
- ☐ **Maintenance Records**
Maintenance records for relevant equipment, including work carried out by third-party contractors.
- ☐ **Kitchen Extract / Ansul Suppression**
Maintenance certificates for kitchen extract or fire suppression systems, where applicable.
- ☐ **Dry Riser / Sprinkler Documentation**
Last inspection certificate for dry riser or sprinkler systems, where applicable.
- ☐ **Internal Weekly / Monthly Checks**
Any internal audit records for fire alarms, extinguishers, and emergency lighting

Please note this checklist is a general guide — specific requirements may vary depending on the building and applicable regulations. If you're missing any of the above, we're happy to advise on free templates and simple recordkeeping to get you compliant ahead of the assessment.
